EXPERIENCE

General Assembly – Software Engineering Immersive

May 2020 - August 2020

Completed 480 hours of instructional classes in front-end and back-end development using several programming languages.

<u>Projects</u>

- <u>Tic Tac Toe</u> : Created an interactive front-end single page application game from scratch with JavaScript, HTML, CSS and a third party api.
- <u>Futbol Real</u> : Is a full-stack development project where I used Express.js back-end to make an optimal soccer fan webpage.
- <u>Carnivorous Plants</u>: With an Express.js back-end and React.js front-end we made it possible to get into the niche market of buying carnivorous plants. Created with three other software engineers we learned the importance of teamwork.
- <u>Live Notes</u>: My spin off of my own note taking app. I tried expanding my knowledge of React.js to make a user friendly interface to be applied in school.

Dave Stern Inc – Tire Specialist

May 2016 - February 2020

- Sold commercial and passenger tires to companies, customers and in house accounts. We installed them at the shop and had full mechanical as well. We had many state, municipal and in house accounts that we consistently serviced.

SMGI – Territory Manager

May 2015 - May 2016

- I had a zone in Manhattan where I had several buildings where I was the liaison for the residents and our client Verizon Fios to set up their services. We worked directly with the leasing offices, real estate agents and building management for optimal customer service.

Olive Garden – Certified Trainer/ Bartender

May 2012 – February 2015

- I trained all front of house employees and worked with upper management to deliver excellent service every shift.
- August Team Member of the Month
